PROJECT #1 - CISC 3141 (Fall 2021)

<u>This is not group work:</u> The first project is to be done individually.

Instructions for Submission: *Remote Submission*

Submit all your code on GitHub. Create a repository with the class name and specify "First Project" (CISC3141_FirstProject). Submit the link with the email subject line "firstName_lastName_course" of your repository to my email at: sumaiya.tabassum@brooklyn.cuny.edu
by **Sunday October 17, 2021, 11:59pm EST**.

Along with the GitHub repository link, be sure to attach the following project submission ("hard-copy") in pdf or word document.

Submission Requirements:

1st page: Project proposal/problem statement
2nd page: Outline
3rd page: Diagram
4th page: Screenshot of your website/webpage

<u>Grading:</u> Project #1 is 20% of your overall course grade. The project itself will be graded out of 100 points.

Below is the grade breakdown of the project out of 100 points:
1. Project Proposal/Problem Statement: 10% - I will not be assigning what the project theme will be. It is up to you to present clearly on a single page what your website/webpage is about and the inspiration behind it.
2. Outline: 20% - Please be clear in your outline. Yes, an outline will not say everything word by word about your website/webpage, however, it should be readable, understandable, and clear. Make sure there is a clear and logical flow in your outline.
3. Diagram: 20% - Translate your outline into a diagram (we did a few examples in class). Make sure there is a logical flow.
4. Code: 50% - Use all tags covered in class and additional tags not covered in class. - Tags covered in class, excluding the necessary tags (e.g. html, head, body, title) were: p, a, h1, h2, h3, h4, h5, h6, div, ol, ul, li, br, table, img - For tags: h1, h2, h3, h4, h5, h6, you do not have to use all of them unless you want to - Use additional tags not covered in class - Use inline, internal, and external css – All three types is a must. Also, please be sure to have good file structure. Keep your css in a separate file as well as you image(s) in a separate file.

<u>Some Project Suggestions:</u>

Below are a few suggestions for your first project. You can choose something else if you wish.

1. Blog Page
2. Landing Page
3. New Product Launch Page
4. Information Page
